Write a Java Program to Convert a Given Number of Days in Terms of Years, Weeks & Days.

Sample Input&Output::

Enter the number of days:756

No. of years:2

No. of weeks:3

No. of days:5

Test cases:

1. 38

2. 3.6

3. 0

4. -365

5. -45

Testcase:

Your Code

```
1 import java.util.Scanner;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         System.out.println("Enter the number of days:");
6         int days=sc.nextInt();
7         int years=days/365;
8         days=days%365;
9         int weeks=days/7;
10        days=days%7;
11        System.out.println("no of years: "+years);
```

```
12         System.out.println("no of week:  
13         System.out.println("no of days:  
14     }  
15 }
```

Output

```
Enter the number  
no of years=2  
no of weeks=3  
no of days=5
```

Write a program to find the number of student users in the college, get the total users, staff users details from the client. Note for every 3 staff user there is one Non teaching staff user assigned by default.

Sample Input:

Total Users: 856

Staff Users: 126

Sample Output:

Student Users: 688

Testcase:1. Total User: 0

2. Total User: -143

3. Total User: 1026, Staff User: 1026

4. Total User: 450, Staff User: 540

5. Total User: 600, Staff User: 450

Your Code

```
1 import java.util.*;
2 public class main{
3     public static void main(String[] a:
4         Scanner sc = new Scanner(System
5         int total=sc.nextInt();
6         int staff=sc.nextInt();
7         int students;
8         if(total <=0) {
9             students = 0;
10        }
11        else if(staff <=0) {
```

```
12         students=total;
13     }
14     else if(staff >= total) {
15         students=0;
16     }
17     else {
18         int nonTeaching=staff/3;
19         students =total-staff-nonTeach:
20     }
21     System.out.println("Student Use
22 }
23 }
```

Output

```
Student Users:688
```
